FW85 ALUMINIUM MULII-FUNCTIONAL FORKLIFT

FW85 is a multi-functional forklift. Its main components are made of aluminium alloy. The product is light in weight and good in looks. It can be used not only as a forklift with only two wheels on the earth, but also as a plate carrier with all four wheels on the earth. When used as a plate carrier, it can be loaded with more goods. It' s more effort-saving and easier in changing directions. When not in use, its small wheels can be taken in. Standing erect, the forklift will only take up small. It' s a product with perfect design.

FW-85
